

Intelligent & Simplified Product Store

Now getting the exact product for your requirement is easier. There may be a situation where your customer immediately wants a quote and you are aware of Product Category/Family/class but not aware of the exact product to be added. With more powerful and classified product store you can now search required products easily which will help you deal with a customer in a quick & easy way.

What's new?

For example, earlier all the NSX upgrade products were listed on selecting NSX and you had to search required SKU from the list. However, with the simplified product store, we have further classified NSX upgrades based on the type of upgrade which simplifies product selection for you.

The screenshot shows the VMware Product Store interface. On the left, there is a 'Filters' sidebar with a 'Clear' button. The 'NSX Upgrades' filter is selected. The main content area displays a table of products with columns for 'Products', 'Description', 'RRP', and 'Add to cart'. The table lists several NSX upgrade options, including 'Upgrade: NSX Advanced to NSX Enterprise' and 'Upgrade: NSX Standard to NSX Enterprise'.

Products	Description	RRP	Add to cart
▼ Upgrade: NSX Advanced to NSX Enterprise	ware NSX Advanced per Processor to NSX Enterprise per Proce...	USD 1,650.00	
☐ NSX-ADV-ENT-UG-C	Upgrade: VMware NSX Advanced per Processor to NSX Enterprise per Processor	USD 2,750.00	
▶ Upgrade: NSX Standard to NSX Advanced			
▶ Upgrade: NSX Standard to NSX Enterprise
