

Yagna Multi Vendor RF Site Planner

Predictive Wi-Fi Survey tool plays a crucial role in wireless business as it overcomes the need of actual site visit and gives you an overview about the site with the signal coverage, signal attenuation, number of access points required.

More businesses these days are realizing the influence of wireless networks on everyday lives, so it is important to have quick and efficient site surveys.

With our experience in predictive Wi-Fi planning, we now bring to you a multi-vendor platform where you can expedite the plan & create professional proposals in minutes using access points from various manufacturers on a unified platform.
